Performance_CHG0053718.pdf;

Hi Team,

Performance Team conducted a peak load test on **10th Dec 2025** in the AISmart APIs Stage environment with 75 concurrent users over a 15-minute steady state. The test measured Errors, average and 90th percentile response times.

Key Observations:

- During the load test, **CPU utilization** at **97%** for the entire test duration.
- Memory utilization was recorded at **41%**.
- Five APIs have a pass percentage below **99%**, rendering the performance report **non-compliant** for CAB reporting.
- Below are the list of APIs breaching the response time **SLA of 3 sec**

APIs	Total_count	Average	90% Line	95% Line	99% Line
01-getControlBoard	649	28.74	30.17	30.34	31.75
03-getCBNotificationsAndOTP	629	2.30	3.95	4.50	6.40
06-getEngControlBoardData	621	3.84	6.60	7.76	9.33
07-getEngAllocationData	620	2.04	3.67	4.20	5.30
11-getFlightDetailByFlightDateStdLclv3	412	27.68	30.12	30.28	32.08
12_1-downloadADCFICFile	403	24.66	30.22	30.29	31.18
12_2-getFlightPlanReportByDateRange	393	22.54	30.19	30.28	31.50
15-download-mel-pdf	387	1.66	3.02	3.91	6.25
18-tailFlightsForHomePage	385	2.07	3.50	4.10	5.30

List of Defects:

- [\[AAM-4416\] High Response Time and 504-Gateway Time Out Observed During Load Test](#)

Next Action Points:

- **Dev Team** should optimize the code and address the defects which are **breaching SLA and Errors**.
- **Performance Team** to re-run the load test after the reported defects are resolved.

Please find the attached CAB report for your reference.

Thanks and Regards,
Akheem Pasha.
