Hi Everyone,

The Performance team conducted a load test on the MyAI Stage Uniform Management Module using 3VU for a duration of 15 minutes. Please find below the key observations from the test:

Key Observations:

- Four APIs returned **400 Bad Request** errors due to test data issues, as discussed earlier today.
- The test did not meet success criteria due to a **high volume of errors encountered** during execution.
- The derived Transactions Per Hour fell below expectations for the following transactions, primarily due to the high failure rate:
 - SC03_UniformManagement_T06_CreateUniformRequest
 - SC03_UniformManagement_T08_GetOrderDetailsByOrderIDCopy
 - SC03_UniformManagement_T09_RescheduleCopy
 - SC03_UniformManagement_T10_WithdrawUniformRequest
- Approximately **30% failure rate** was observed across the aforementioned APIs.
